

Sharp's advanced AN-3DG30 active shutter 3D glasses provide an attractive component to the AQUOS® Quattron™ 3D experience. When matched with the LC-90LE745U through LC-60LE745U and LC-80LE844U as well the 845 series, the AN-3DG30 offers a unique set of features that enhance the 3D experience, including a unique 3D/2D Conversion Mode button and several comfort-related design elements.

Features

3D/2D Mode Conversion button enables simultaneous viewing of 2D and 3D images by different people in the same room.

Two kinds of nose pads are included to fit children and adults.

Dedicated glasses band ensures a perfect fit and no slipping off.

Specially designed case and cleaning cloth are included.

Battery life - Approximately 50 hours continuous use on the Lithium ion polymer rechargeable battery
